

3DEXPERIENCE®

DIGITAL TRANSFORMATION IN MINING GEOVIA ENTERPRISE COLLABORATION

Designed for mining professionals of all levels, Enterprise Collaboration enables **Zero Distance** between departments, sites and companies, enabling effective collaboration.

Whether you're working on projects across different sites or looking for technical content to help you work better, our secure platform enables **cross-functional teamwork**.

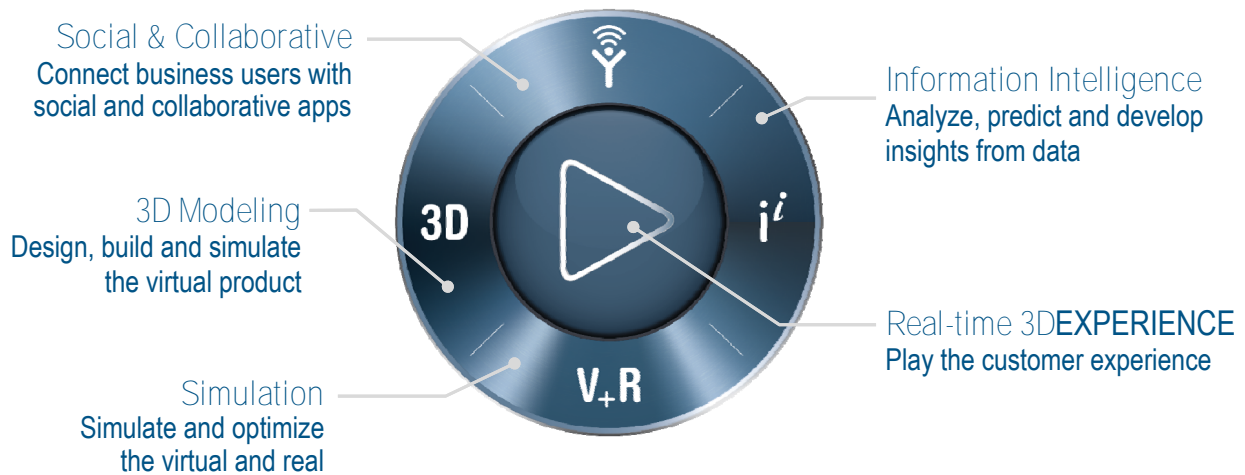

Hosted on the cloud backed up by secure Dassault Systèmes data centers, the 3DEXPERIENCE platform is your **digital link** to your professional community.

What is the 3DEXPERIENCE platform

The 3DEXPERIENCE platform is a BUSINESS EXPERIENCE platform that provides software solutions for every mining organization from - geology to planning to finance - that help each person within their department and teams, to be more productive and efficient.

With a single, easy-to-use interface, it powers INDUSTRY SOLUTION EXPERIENCES, based on 3D design, analysis, simulation and intelligence software in a collaborative interactive environment. It is available on premise and in public or private cloud.

We describe the platform as a compass, with the apps organized in the different quadrants as follows

The **3DEXPERIENCE** platform connects GEOVIA users with role based applications to:

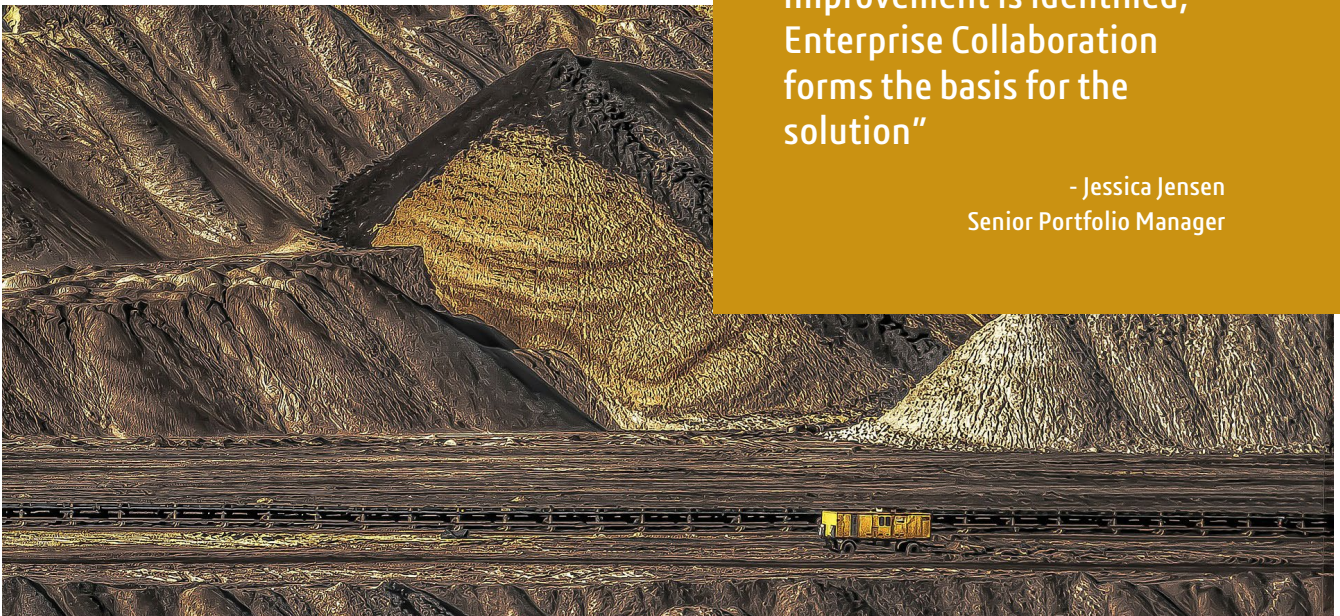

- Run GEOVIA applications such as Surpac and MineSched.
- Connect people, ideas, data and solutions in real time internally and externally to the organization
- Enable centralized control and view of mining data, providing a single source of truth on your business operations for rapid and informed decision making
- Collaborate efficiently with traceability across the mining value chain
- Manage projects efficiently and enable easier reporting with a single source of truth
- Ensure standard operating procedures, including stakeholder approvals
- Easily organize, access and execute work quickly using a Kanban style task dashboard

Challenges faced in organizations without effective collaboration

- Data may or may not be accurate due to human errors
- No central repository to house documents and work, leading to issues with version control, particularly during end of month and shift changeovers
- Lack of full and transparent communication between departments, approval routing is unclear
- Ideal standard operating procedure not defined
- Difficult to get a complete view on the status of team projects

"No matter what area for improvement is identified, Enterprise Collaboration forms the basis for the solution"

- Jessica Jensen
Senior Portfolio Manager

GEOVIA users can now access and leverage the full collaborative capabilities of the **3DEXPERIENCE** platform including sharing data, collaborative data lifecycle management, mining workflow collaboration and approvals, playing 3D content, and the ability to create platform based dashboards to consolidate tasks and data.

Benefits of effective collaboration using the 3DEXPERIENCE platform:

Share your GEOVIA files securely with your peers and stakeholders

Centralized control and view of mining data, providing a single source of truth on your business operations

Annotate, mark-up and comment on files,
and share them directly with anyone
involved in your project

Create and access online communities enabling social interactions between you, your peers and experts

Store everything in the cloud, using 3DDrive

Collaborate efficiently with traceability across the organization

Manage approval workflow by delegating tasks (manager) or triggering the approval process (employee)

Monitor project tasks, issues, and risks based on real-time information – view tasks at a glance using Kanban boards

Supervise entire projects with Gantt charts, reports, and project analytics

Leverage in-context task assignments to enable the right governance

Create and review content with standard, repeatable processes

Collaborate efficiently with traceability across the mining value chain

"Most customers are eager to undergo digital transformation, but do not know where to begin. We partner with our customers to help guide them on their journey."

- Jessica Jensen
Senior Portfolio Manager
